

The Bible Adventure Book of Scavenger Hunts

Kelly Anne White

Sky Light

In 2002, two astronomers deemed the color of the universe to be a light beige—hypothetically visible to the eye if all the light in the universe were contained at once. The Johns Hopkins University researchers nicknamed the color “Cosmic Latte,” so the recipe below is for a caffeine-free latte inspired by that color.

Recipe

Not-of-This-World Latte

This is a wonderful warm beverage for enjoying on a chilly overcast day or at night underneath the stars.

15-ounce can pure pumpkin
1/4 cup smooth peanut butter
2 tablespoons pure honey

1 teaspoon ground cinnamon
2 quarts vanilla almond milk

Combine all the ingredients in a large saucepan over medium heat on a stove or over a campfire. Bring to a slow simmer, stirring often. Ladle warmed latte into heat-friendly cups or mugs, or let cool slightly and then serve over ice for an iced latte. Fancy it up! Top with fresh whipped cream, drizzle with pure maple syrup, and sprinkle on some graham-cracker crumbs. Makes 7 cups.

Too hot to handle? Make smoothies instead! Whisk the exact same ingredients in a large bowl, and then add to a blender in batches with some ice. Pour into cups with straws, and add the fancy toppings.
